

Firth Primary School Health Update

Kia ora Whanau

It is that time of the year when coughs and colds are prevalent. If your child is sick please keep them home. We also have a case of ringworm and impetigo in the school. These are highly contagious and your child must stay home for the incubation period to avoid spreading this to others. Please check your child for anything that may look like either of these so you can treat accordingly. You can go onto the ministry of health website for more information. We appreciate your support with this matter. Please do not hesitate to contact me principal@firth.school.nz if you have any further questions.
